

The Mobius loop on a dark background indicates that a product contains recycled materials. A percentage in the logo's center may appear, indicating how much of the product was made of recycled materials; no percentage listed implies that the product is made of 100% recycled content.

The Mobius loop on a light background indicates that a packaging or product can be recycled where facilities exist. Visit your city's or municipality's website for more information on local recycling programs, as well as to locate your residential recycling and composting facilities.
